## 3500kg Race Car Transporter

The KFS low angle slidebed offers a superb package to allow all types of race car to be loaded onto the body, it has simple one button operation for the body with 2 pull out ramps.

The lightweight aluminium frame cover keeps the load secure and clean, the cover is a heavy duty material to ensure long life.

The body is fitted with recessed tie rings as standard but can also be fitted with load tracks to allow more flexible tie down options.
