

**A genuine alternative  
to the traditional  
recovery vehicle**

## Citroen Relay based **Slide Bed** Recovery Truck from KFS

*The vehicle comes with a host of features as standard;*

- Ramsey 8,000lb winch
- Full light bar
- Locker box
- Work lights
- Tool locker and vehicle straps

The vehicle makes sense operationally. Grossing at 3.5 ton with 1,520kg payload the vehicle can be driven by anyone with a standard car license and returns upwards of 27 miles per gallon.

With a deck length of 4.5 metres the vehicle can carry most medium size family cars and with the latest 2.2 ltr 120BHP Euro 4 engine fitted in the Citroen Relay the vehicle can fulfil a number of roles, from traditional recovery through to courtesy car delivery.

The galvanised chassis and all aluminum bed maximises payload without compromise to the vehicles integral strength.
